actions to breathe cleaner study.

Detective Sheet.

Logan has been having some problems with his breathing recently. The doctor has asked him to think about the quality of the air he breathes. Logan says that the air he breathes isn't polluted. However, there are lots of changes that he can make to improve the quality of the air that he breathes. **Your task** is to use your detective notes to help you sniff out the changes and give him some advice so Logan can reduce his exposure to air pollutants.

Key facts about Logan:

- Logan gets driven to school. The journey would be about a 10 to 12 minute walk. In the summer, he loves having the window down and the winds rushing in.
- Logan walks to the shop everyday with his aunt. He takes the route shown on the map.
- He meets his friends every Saturday to play football where there is a big X.
