## Task 1

Use the table to research information about glass packaging:

| | What kinds of packaging are made from this material? | Can it be recycled? If so, where can it be recycled locally? | What are the benefits of recycling this material? |
|---|---|---|---|
| Glass | | | |

## Stretch challenge:

Add more rows to the table and find out information for other recyclable packaging materials like cardboard and plastic.

## Task 2

Research the benefits to recycling glass packaging further. Have a class discussion about the main reasons for recycling glass bottles and jars.

| Benefits | Evidence |
|---|---|
| It saves money for the local authority/ community | |
| It saves energy and reduces CO2 emissions | |
| It preserves natural resources | |

Despite these reasons **only 67% of glass packaging was recycled in the UK in 2016**. Why do you think this is? What do you think is the most persuasive reason is for getting people to recycle more glass packaging?
