

YOU WILL NEED A stick, string/wool or glue.

STICK JOURNEY MAP

1. Take your stick, glue and pieces of string or wool and start to walk slowly with your eyes wide open. You are going to record your journey using treasures that you find as you go.
2. Starting at the top of the stick find an item that shows where you began your journey – maybe a leaf from the tree you are standing underneath. Tie or glue it on to the stick.
3. As you make your way around the area find a different item to show where you have been. For example, you might want to add a leaf or flower you find lying on the ground.

Leave a space between each item on your stick.

REMEMBER

You're a responsible explorer so think carefully before picking things up to add to your journey stick. Consider if each item is safe, and if you aren't sure check with an adult.

Remember only to use found items, not to pick from plants or trees
