

SAMSUNG

Calling all changemakers!

Your chance to design the future.
No qualifications needed.

13-15
year
olds

It's competition time!

We want you to tell us
how tech can solve a
problem and make the
world a better, more
sustainable place.

It could be a way to:

- Reduce food waste
- Help us save energy
- Upcycle waste into something we want, need or love
- Protect animals or conserve habitats
- Create future farms and environmentally-friendly produce

Amazing prizes up for grabs

- A top-of-the-range Samsung smartphone (A52 5G) PLUS Galaxy Tab book (A7)
- Great runner up prizes, such as Galaxy Buds Pro in stylish Phantom Silver
- The chance to attend a Samsung Event as a VIP guest
- Every single young person who enters will receive digital Credly certification for their CV or college application
- Plus, the named teacher or parent of the first prize winning student will also receive a Samsung Galaxy Tab A7

Please check the full [Terms and Conditions](#) for all prize-winning information.

Ok, I've got it. How do I enter?

Once you have your idea, simply visit <https://woobox.com/xpdt4z> by **9th September** and fill out the form there with the help of your teacher or guardian. You'll need to write no more than 200 words (please use drawings, photos or videos too!) to explain your idea.

If you are entering an idea that you developed with other people (for example in the team design sprint session) then please be sure to include their names too. Up to three people can be named per idea — and if it wins, each of you will get a prize!

UK/ROI secondary school students aged 13-15. 'Enter' via the National Schools Partnership website before 09/09/21. See <https://nationalschoolpartnership.com/samsung-competition-terms-and-conditions/> for full Ts&Cs.

How will the competition be judged?

We only have three criteria!

1. Be innovative and creative!

See things from a brand new angle; try something out that no-one ever has.

2. Ideas with impact

Show us how your idea could benefit people and planet, and make a better world.

3. Use tech for good!

Remember it's tech that we're interested in — so that might be an app, an AI, a robot, some code, a device, or a way of repurposing existing tech. We are looking for ideas that use tech to solve a problem.
