

DEAR TEACHERS,

Knorr® is inviting your pupils to stand up for their plate & the planet with the Knorr®, Root for Veg programme.

It is a brand-new cross-curricular programme being run in primary schools across the UK! Where your pupils will learn about the effects that consuming too much meat has on the planet, the benefits of introducing lots of new veggies to their favourite dishes & the importance of Cheating On Meat.

The Knorr® Root for Veg programme is linked to what pupils need to learn in the Design & Technology, Science, Geography and PSHE UK curriculum. There is an assembly and whole school competition to help the whole school learn more about making small changes to what we eat can make a BIG impact on your health & the planet!

You can help your pupils to succeed in the competition by encouraging them to complete the home challenges:

Two winning schools will be drawn from those who have had the most engagement, across the school, in the home challenges, and made the biggest impact. The schools will win:

£200
GARDENING VOUCHERS
 These will be gardening vouchers for the school.

£350
GARDENING KIT
 This will include gloves and tools suitable for pupils.

HAMPER
FROM KNORR®
 A hamper for the teacher!

We'd love you to encourage as many pupils as possible to complete the challenges and help your school to win these fantastic prizes.

All we ask of you is to check the challenges have been completed and fill in the form below!

OR simply send through the results from your school directly to our email: rootforveg@nationalschoolpartnership.com

Best of luck, we look forward to seeing lots of your pupils involved. Small changes can make a BIG difference!

Knorr® Root for Veg

I confirm that the following number of pupils have taken part in each of the 3 challenges: _____

Grow It!: _____ Cook It!: _____ Change It!: _____

Name: _____ Date: _____

Signature: _____
