

## YOUR MISSION:

Complete as many of the sustainable water actions written on the droplets as you can! Colour them as you go and add your own actions to the blank drops! Write your total in the droplet on the bucket on the reverse of this sheet.

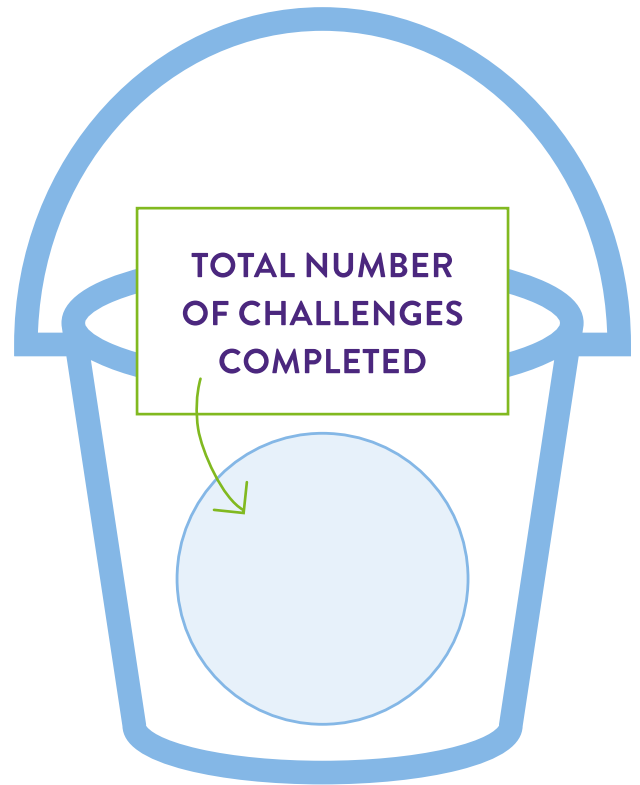

You can do it!

**NAME:**

**CLASS:**

## NOTE TO PARENTS AND CARERS:

As part of our whole-school engagement with Scottish Water Generation H<sub>2</sub>O, your child is taking part in Mission H<sub>2</sub>O. This is a project for Primary schools across Scotland to encourage children to protect, save and appreciate Scotland's water.

Your child has been set the task of completing as many sustainable water challenges at home, at school and in the community as possible. Any support that you can provide to your child with this mission would be most helpful.

Suggestions for simple everyday water actions are provided on the water droplets on the reverse of this sheet and your child should colour these if they have been completed. Some are left blank for your child to add in any other actions that they take to save and protect water.

At the end of the week, the completed actions should be totalled up and written inside the small water drop on the bucket. The class with the greatest number of challenges completed will be awarded seed packets.

Please ensure your child brings their scorecard back to school by:
