Do your own investigating now that you have much more knowledge of the renewable energy sector, think about the types of jobs you want to do and see what opportunities exist.

Examples:

SOCIAL MEDIA MANAGER

+

ENERGY SECTOR

LAWYER

+

ENVIRONMENT

MARKETING MANAGER

+

GREEN ENERGY

Top Tip

Add an industry key term to a job to see what's out there.

KEY TERMS

CLEAN ENERGY

CLIMATE CHANGE

GRID

CARBON

ENVIRONMENT

SUSTAINABLE

NET ZERO

Want to know more about Meta Skills?

 Use the [Skills Development Scotland Meta Skills Self Evaluation](#) wheel to deepen your understanding of Meta Skills

By taking part in the ⚡ **Power Up Career Exploration Challenge** you have used and applied your **Meta Skills**. Meta skills are transferable which means they help you to adapt to different situations in education, life and work. Understanding and recognising these skills can lead to success in whatever context the future brings.

FOCUSING

You showed focus by:

- asking questions to understand the task and helping others with their understanding
- using information from different sources and presenting your findings

COMMUNICATING

You communicated by:

- using technical terms to question and explore ideas
- confidently asking questions
- exploring and discussing alternative solutions

COLLABORATING

You collaborated by:

- responding positively and respectfully to others
- listening to other group members' views
- negotiating an agreed outcome

LEADING

You led by:

- leading and participating in discussions
- motivating others to complete the challenge
- sharing your opinion and influencing others

CRITICAL THINKING

You applied critical thinking by:

- explaining difficult ideas
- presenting new and complex ideas to your class
- using problem solving strategies to complete the challenge
- sharing logical opinions based on facts and evidence

CREATIVITY

You showed creativity by:

- working with your team and coming up with a solution to the curveball
- showing resilience when a problem arose
