

In order to protect our planet, we need to use our resources carefully.  
What is your personal pledge to reduce, reuse or recycle?

## MY PLEDGE

To protect our planet's precious resources, I will...

## FAMILY RECYCLING FACTS AND TIPS

### Did you know...?

- Aluminium and steel can be recycled endlessly, without losing quality.
- It can take as little as 60 days for a drink can to be recycled, and back on the supermarket shelf as a new can.
- Recycling aluminium drink cans saves up to 95% of the energy it takes to make aluminium from raw materials.
- 15 billion drink cans are sold in the UK every year – that's 246 cans for every man, woman and child living in the UK.
- The drink can is the world's most recycled packaging container.
- 75% of the aluminium ever created is still in circulation today.
